Special Plant Engineering and Construction

In the area of **Special Plant Engineering and Construction** we can flexibly answer to various requirements. We develop stand-alone systems as well as spatially integrated solutions with the aim to change or expand existing facilities.

Our **Range of Service** for customized laboratory and pilot plants as well as automating and testing systems:

- Planning and development
- Dimensioning and layout
- Construction and modification
- Manufacturing and assembly
- Technical documentation
- Consulting and service

Our generous spacious conditions allow us to offer our customers the opportunity to use their facilities in-house for a longer period of time for example until the building of their premises is completed.

We cooperate with market-leading brand manufacturers, renowned scientific research institutes and laboratories. Surely we can also support you and manufacture a custom-made facility according to your requirements.

We are always searching for solutions to realize your wishes.
